SKILLS

Technical Skills

- Data Analysis & Machine Learning:** Pandas, NumPy, Scikit-learn, EDA, Data Preprocessing, Predictive Modeling
- Data Analytics & Business Intelligence:** Power BI, Tableau, SAP Analytics Cloud, Pentaho
- AI:** Machine Learning, Deep Learning, Generative AI, Agentic AI, RAG
- Web Technologies:** FastAPI, Django, Streamlit
- Database:** PostgreSQL
- Developer Tools:** Kaggle, VS Code
- DevOps & Containerization:** Docker, Kubernetes
- Version Control:** Git, GitHub

Soft Skills

- Problem Solving, Critical Thinking, Time Management, Leadership, Quick Learner, Analytical Thinking, Team Collaboration

EDUCATION

Master of Technology in Artificial Intelligence and Data Science

[2025-Present]

Vellore Institute of Technology, Chennai, Tamil Nadu
GPA - 8.62

Bachelor of Technology in Computer Engineering

[2022-2025]

Sarvajanik College of Engineering and Technology, Surat, Gujarat
CGPA - 8.96

Diploma in Computer Engineering

[2019-2022]

Government Polytechnic For Girls, Surat, Gujarat
CGPA - 8.35

CERTIFICATIONS AND AWARDS

- NPTEL Certification in Database Management Systems
- Secured third place in the New Vibrant Hackathon for the project "IoT-Based Smart Garbage Collection System."
- Won second prize at Updates 2023 Techfest.
- Volunteered at the Updates 2023 Techfest.

PROFILE

Data Science and Artificial Intelligence enthusiast with hands-on experience in Python, SQL, Machine Learning, Power BI, Generative AI, and Agentic AI through multiple internships. Strong foundation in data analysis, machine learning algorithms, and data visualization. Seeking a Data Science internship to apply analytical and machine learning skills to real-world problems.

WORK EXPERIENCE

Data Science Intern

EVOSTRA VENTURES PVT LTD

07/2024-08/2024

- Performed web scraping on a car listing website using Python to collect structured data including brand, model, price, mileage, and fuel type.
- Cleaned, processed, and analyzed the scraped data using Pandas and NumPy, and conducted exploratory data analysis (EDA) to derive actionable insights.

Data Analytics & Machine Learning Intern

Edunet Foundation

01/2025-03/2025

- Built interactive dashboards using SAP Analytics Cloud and Power BI incorporating KPI indicators, trend analysis (line charts), category comparisons (bar charts), and distribution analysis (pie charts) to support project monitoring.
- Applied supervised and unsupervised machine learning techniques to data analysis tasks and contributed to the development of GlobalGrad, a portfolio website integrating analytics-driven insights.

PROJECTS

Multiple Face Attendance System using Deep Learning

- Developed a real-time multi-face recognition system capable of detecting and recognizing 30-35 faces simultaneously in classroom environments using computer vision techniques.
- Technologies Used: Face Recognition, Streamlit, OpenCV, YOLO

Stock Market Website (TradeSync)

- Created the graphical user interface (GUI) and dashboard for an automated trading bot on a full-stack stock exchange. Integrated the Gemini API to support trade execution logic and real-time market data processing. This helped us reach an average directional accuracy of about 94% across ten stocks using AI-based predictive modeling.
- Technologies Used: Python, Django, Tailwind CSS, HTML, React, Firebase, Deep Learning

RAG-Based Placement Preparation Assistant using LLMs

- Built a RAG-based AI placement assistant that analyzes resumes, detects missing skills, retrieves relevant learning resources using FAISS vector search, and generates personalized interview preparation plans using LLMs.
- Technologies Used: Python, LangChain, FAISS, HuggingFace Embeddings, Groq API, Streamlit, NLP, RAG
